

PRODUCT INFORMATION & GENERAL CARE GUIDE

Quality: TORINO crib 5 (ITALIAN LEATHER COLLECTION range L7)

Torino is a high quality aniline leather with a wax finish to give a popular cracked, antique effect and distressed look (goes lighter when stretched). Due to this wax finish, that can mark when abused, care should be taken and so suggested suitable for 'exclusive' contract upholstery applications

Type: aniline

Approximate hide size: 4.6 / 4.8 sq mtrs

CARE AND CLEANING

- Torino is a speciality leather and due to the nature of the wax finish in some 'heavy use' environments mistreatment can result in scuffing. In minor cases it is usually possible to erase the mark by rubbing a thumb over the damage with enough pressure to create some friction.
- Under normal conditions leather needs little care and attention. Regular dusting with a soft clean cloth or vacuum using a soft brush attachment removes dirt that is abrasive, speeding up normal wear.
- Spills such as liquids, grease, butter etc should be dealt with immediately by dabbing with a dry cloth or paper napkin. Further treatment is not advised as attempts to remove marks may increase damage. In most cases remaining marks will fade after a short time.
- Never use cleaners as this can destroy the leather.
- Do not put hot cups (tea, coffee etc.) onto the leather.
- Protect from sustained direct sunlight and do not expose to excessive heat. In temperatures of 35 degrees centigrade (or more) the wax finish and colour will change.
- Protect from sharp objects such as shoe buckles.
- If in doubt please consult a leather cleaning specialist.

COLOUR VARIATIONS

As leather is a natural product no two hides are identical and some variation in shade and texture is to be expected. Colours presented in this swatch should be used as a guide only.
