

AQUACLEAN INDOOR / OUTDOOR Specification.

quality	composition	weight	martindale	width
California Aquaclean	100% P	458gsm/13.51oz/yd ² +/-	45 000 rubs	140cm/55in +/-
Laguna Aquaclean	100% P	415gsm/12.24oz/yd ² +/-	70 000 rubs	140cm/55in +/-
Venice Aquaclean	100% P	415gsm/12.24oz/yd ² +/-	70 000 rubs	140cm/55in +/-
Catalina Aquaclean	100% P	415gsm/12.24oz/yd ² +/-	45 000 rubs	140cm/55in +/-
Hermosa Aquaclean	100% P	427gsm/12.59oz/yd ² +/-	45 000 rubs	140cm/55in +/-

Resistance to pilling.	5 (ISO/DIS 12945-2 grey scale graded 1 to 5 where 5 indicates no change).
Colour fastness to light.	7-8 (ISO 105-B02 blue scale graded 1 to 8 where 7 indicates excellent light fastness).
Colour fastness to rubbing.	5 dry, 5 wet (ISO 105-X12 grey scale graded 1 to 5 where 5 indicates no change).
Flammability.	BS 7176 Medium Hazard, over CMHR 35 foam, IMO A652/16, CAL 117, NFPA 260.
Application.	SUITABLE FOR SEVERE CONTRACT, INDOOR & OUTDOOR UPHOLSTERY
Maintenance.	This fabric uses Aquaclean technology, for full details see CARE GUIDE 'AQ_InOut_Sept2023'. Aquaclean Indoor/Outdoor is rated for outdoor upholstery due to its high colour to light performance and servicability, however these fabrics are not waterproof and should not be left outside for prolonged periods in wet and severe weather conditions where they can become saturated and soiled. All stitching should be properly sealed. As this fabric is fire retardant it is suitable for indoor as well as outdoor use. Batch to batch variations may occur within commercial tolerances.

COLOUR PROTECTION TECHNOLOGY

Aquaclean Indoor/Outdoor is recommended for use outdoor due to its high colour to light performance. Colour Protection Technology means that it will resist fading in sunlight showing outstanding results in the following standards;
 EN ISO 105-B04 Colour fastness to artificial weathering
 EN ISO 105-E02 Colour fastness to sea water
 EN ISO 105-E03 Colour fastness to chlorinated water.

AQUACLEAN TECHNOLOGY ADVANCED UPHOLSTERY PROTECTION

The Aquaclean technology used in this upholstery fabric helps protect the fabric against the majority of spills and stains without having to resort to specialist cleaning.

Aquaclean protects fabric from even the toughest stains, simply clean with water.

Some of the toughest stains, even pen stains are easily removed.

Dampen with a clean cloth, rub the stain softly in a circular motion.

The stain will have disappeared when the cloth is removed.

To completely remove tough dried in stains water with a little neutral soap may be used, where severe soiling has occurred professional upholstery cleaning may be required (see CARE GUIDE AQ_June2020).

AQUACLEAN® ADVANCED FABRIC PROTECTION

Aquaclean® sets the standard in easy care fabrics for hospitality. By cleaning with 'just water' we see Aquaclean® fabrics consistently outperform third party treatments in the most severe contract, hospitality and cruise ship environments making it an established leader in easy care upholstery by taking fabric 'protection' to the next level.

Unlike traditional liquid/oil repellent treatments, which are added to the fabric after weaving and less effective once the stain has penetrated the fabric, Aquaclean® covers every single fibre which not only repels the stain but also ensures that dirt and stains can be removed simply by applying water.

ANTIBACTERIAL & STAIN RELEASE TECHNOLOGY WITH AQUACLEAN® & SAFE FRONT®

All Aquaclean® qualities incorporate SAFE FRONT® as standard to give protection against bacteria, viruses and mites. It is a totally ecological and harmless method of effectively reducing the activity of these microbes and has been certified to ISO 20743:2013 8.1, reducing bacterial activity by 99.99% after 24 hours, and ISO 18184:2019, demonstrating 91% effectiveness against feline coronavirus.

The joint formula of Aquaclean® and SAFE FRONT® offer a double guarantee of hygiene helping your furniture stay clean and safe.

(Safe Front standard on all production from June 2020, older stocks may not include this finish so if required please request when ordering/specifying).

CLEANING WITH JUST WATER AND GENERAL RULES TO FOLLOW

Aquaclean® and SAFE FRONT® protects fabric from even the toughest stains, simply clean with water.

- Remove any excess residue on the fabric and apply clean water over the stain, either directly or using a damp cloth.
- Wait a few seconds then press down over the stain with the clean damp cloth and rub gently over the fabric using circular movements. Repeat the process as required.
- It's important to regularly vacuum the upholstery with a soft brush attachment to keep the fabric in the best condition.
- For spot cleaning tough dried in stains use water with a little neutral liquid soap (max 5% solution), repeat if necessary.
- Protect from excessive sunlight and avoid contact with strong heat.
- Do not use bleach, strong chemicals, toxic substances, acids or solvents.
- Clean up spills and stains right away, the longer stains are allowed to remain the more difficult they are to remove.
- Strong or neat alcohol if not cleaned immediately may cause damage to the fabric.
- Do not soak or over wet the fabric as this may cause further staining and damage.
- After cleaning allow to completely dry before use and then gently brush with a soft brush in the direction of the pile.
- When dealing with any stain it is important to always test an inconspicuous area of the fabric first to ensure the treatment will not cause permanent damage. If in any doubt specialist upholstery cleaning advise should be obtained.

DEEP CLEANING RECOMMENDED DISINFECTING CLEANING

Aquaclean® includes SAFE FRONT® which is effective in reducing the build-up and activity of viruses, however if disinfection cleaning is required the following is recommended:

- Steam clean using a dedicated upholstery steamer with suitable attachment and lowest heat setting to avoid damage. Allow to fully dry after treatment.
- The occasional use of appropriate antibacterial wipes following manufacturers guidelines.
- The use of bleach, alcohol and soap solutions are not recommended. Soap can leave residues causing discolouration and odour.

IMPORTANT. Although this fabric will resist most types of staining under normal contract conditions it does require regular care as described. Spills that are allowed to remain on the fabric for long periods of time can cause damage and in rare cases may not be completely removed. Aquaclean® drastically reduces the chances of fabric staining although we are unable to guarantee against all types of staining and marking and accept that there may be environments where its use is not suitable and non upholstered furniture would be more appropriate. In these instances we cannot be held responsible for the performance of the fabric. We do not recommend and take no responsibility for the performance of the fabric when used for piping. Our 'limitation of liability' as detailed on our price list applies.
