FULL GRAIN REAL LEATHER

	result	test method
composition	100% real leather	
thickness	0.9 / 1.1mm	
av. hide size	5 sqm	
leather type / origin	bovine / European	
grain / finish	corrected / semi aniline	
tanning method	chrome	
application	residential, contract/hospitality upholstery	
FR rating	BS EN 1021 parts 1 & 2, BS 5852 crib 5 BS 7176 Medium Hazard over CMHR 35 foam IMO part 8 CAL 117 & NFPA 260	
flex resistance	30 000 cycles, no cracks	UNI EN ISO 5402
tear resistance	>20N	UNI EN ISO 3377-1
rensil resistance	>10N	UNI EN ISO 3376
dry finishing adhesion	>2N/cm	UNI EN ISO 11644
dry rub fastness	grade 4 @ 250 cycles grey scale graded 1 to 5, 5 indicates no change	UNI EN ISO 11640 / UNI EN ISO 11641
wet rub fastness	grade 3/4 @ 50 cycles grey scale graded 1 to 5, 5 indicates no change	UNI EN ISO 11640 / UNI EN ISO 11641
alkaline rub fastness	grade 3/4 @ 20 cycles grey scale graded 1 to 5, 5 indicates no change	UNI EN ISO 11640 / UNI EN ISO 11641
light factness	grade 4 @ 48 hours blue scale graded 1 to 8, 8 indicates no change	UNI EN ISO 105-B02
care	Please refer to our CARE GUIDE L1 for full care & cleaning details.	
characteristics	Heritage is a semi aniline leather with a medium sheen and slight pull up characteristic. So when stretched the colour will slightly lighten giving a contrast of shades between the top-coat and hide colour underneath, traditional antique effect. This quality also includes a resilient coating designed to protect against everyday soiling and light scratching.

These results are based on manufacturers own testing and in accordance with the relevant standard but not overseen by an independent body and are for guidance only. In accordance with normal trade practice batch to batch variations may occur within commercial tolerances. Current production may differ marginally and we reserve the right to alter specifications without notice. FR testing is predictive and customers must ensure their complete furniture/make up meets the necessary standards for their specific application. All values and measurements are approximate

Leather is a natural product, each individual hide will be unique and in some instances show growth marks, scars, variation in grain and other natural characteristics which add to the style and beauty of real leather. These are unavoidable and should not be regarded as a defect. No two hides are the same and some variation in shade and texture is to be expected.

ENVIRONMENTAL REAL LEATHER IS A GREAT SUSTAINABLE OPTION.

All our leathers are responsibly sourced and are by nature a by-product of the food industry which would otherwise be discarded. Tanned in Italy they are fully REACH compliant, halogen free, PFC free and containing no harmful substances. Leather is both natural and long lasting, repairable and at the end of its life recyclable and biodegradable.

CARE INSTRUCTIONS GENERAL RULES TO FOLLOW.

- Vacuum regularly to avoid build up of crumbs, dust, dirt and other matter.
- Clean regularly by wiping over with a damp cloth, but not over wet, using circular motions until the dirty parts are clean. Then dry immediately with a soft cloth.
- If necessary a little soapy water can be added to the above for occasional spot cleaning. To avoid water marking do not over wet the fabric and ensure all soap residue is removed as a build up of this can cause fabric discolouration and odour.
- NEVER USE detergents, saddle soap, wax or spray polish which can cause irreversible damage.
- For more stubborn stains a proprietary leather care cleaners can be used following the manufacturers instructions.
- Clean spillages and stains as quickly as possible with a dry absorbent cloth, do not leave to dry in.
- After cleaning a neutral leather cream can be used to restore sheen following the manufacturers instructions.
- Too frequent or over enthusiastic cleaning or application of leather cream may wear away the upper, darker coat and affect the original colour of the leather.
- When dealing with any stain it is important to always test an inconspicuous area of the fabric first to ensure the treatment will not cause permanent damage. If in any doubt specialist upholstery cleaning advise should be obtained.
- Do not allow body oils, alcohol based sanitizers, perspiration or hair products to settle into the grain of the leather as a build up of these will gradually damage and break down the finish.
- Avoid sharp objects such as belt buckles, studs and zips which can scratch the surface of the leather.
- Strong or neat alcohol if not cleaned immediately may cause damage to the fabric.
- Protect from excessive sunlight and avoid contact with strong heat.

IMPORTANT. Although our leathers are tested for general contract/hospitality upholstery use they are designed to perform under normal conditions and with regular care as described. Please be aware that spills that are allowed to remain on the fabric for long periods of time can cause permanent damage. We accept that there may be environments where the use of this product is not suitable and other options may be more appropriate. In these instances we cannot be held responsible for the performance of the leather. **We do not recommend and take no responsibility for the performance of the fabric when used for piping.** Our 'limitation of liability' as detailed on our price list applies.
